SKILLS

- Languages: PHP, Java, JavaScript, HTML, CSS
- Frameworks & Libraries: React, Spring Boot
- Databases: MySQL, MongoDB, PostgreSQL
- Tools: Git, Visual Studio Code, IntelliJ IDEA
- Other: RESTful APIs, JWT Authentication, MVC Architecture

EDUCATION

Bachlor in Computer Application(BCA)
Tribhuuvan University
Mechi Multiple Campus, Bhadrapur

Computer Science Engineering
Salford University | 2009-2013
123 Anywhere St., Any City

ABOUT ME

Passionate and dedicated Bachelor of Computer Applications (BCA) student in the 7th semester, with a strong foundation in web development and backend technologies. Proficient in PHP, Java, Spring Boot, and React. Seeking opportunities to apply my technical skills in dynamic projects and contribute to innovative solutions in the software development industry.

PROJECTS

BLOG (Spring Boot & React)

Developed a video library management system that allows users to upload, categorize, and stream videos. Implemented JWT-based authentication for secure user access and integrated file uploads with metadata.

- Technologies: Spring Boot, React, MySQL
- Key Features: User authentication, video file uploads, REST APIs for video management, and responsive front-end design using React.

Learning Management System (Spring Boot & React)

Built an LMS where instructors can upload courses, track student enrollments, and manage course materials. Students can enroll in courses, track progress, and interact with content.

- Technologies: Spring Boot, React, PostgreSQL
- Key Features: Role-based access control, course enrollment system, and dashboard for instructors and students.
